

OP. DR. YALÇIN İŞCAN

OPHTHALMOLOGY

SUMMARY

Op. Dr. Yalçın İŞCAN graduated from **Istanbul Faculty of Medicine** in 2005 and completed his specialization at **Bakırköy Dr. Sadi Konuk Training and Research Hospital** in 2010.

Between **2011 and 2015**, he worked at **Batman Regional Hospital**, where he performed thousands of eye surgeries.

From **2015 to 2025**, he served at **Private Batman Dünya Hospital**. During his tenure, he performed numerous operations in the fields of **cataract, cross-linking, strabismus, pterygium, refractive surgery, oculoplastic surgery, tear duct obstruction, and corneal transplantation**, establishing the hospital as a **reference center for ophthalmology** in the region.

Since **2023**, alongside his work at **Batman Dünya Hospital**, he has also been providing services **two days a week** at **Pendik Medical Park** and **Kudret Göz İstanbul**.

In **2020**, Dr. İŞCAN began **R&D activities**, founding a **startup company in a technopark**, where he developed an **AI-based Red Eye Diagnosis Support System device**. His research and development efforts continue in the field of ophthalmology with various software and device innovations.

In addition, Dr. İŞCAN is active in academia and has published **numerous national and international scientific papers**.

Medical Interests

- Cataract
- Corneal Transplantation
- Refractive Surgery (PRK, LASIK, SMILE, Phakic Lens)
- Strabismus
- Oculoplastic Surgery (Eye Aesthetics)
- Tear Duct Obstruction
- Pterygium
- Keratoconus Treatments (Cross-Linking, Intracorneal Ring Segments)
